Cσnductivity — Website Inputs Required

Content, images and decisions we need from the team to take the website from placeholder to launch-ready · Prepared 13 October 2026

How to use this document. The website is built and working, but many sections still show grey "Replace with real photo" boxes, bracketed text such as *[Mission statement to be confirmed]*, and sample (made-up) events and articles. Each row below is one thing we need. Send each item to the person named in the **Owner** column (fill it in), tick the box when it is sent, and return the files in the sizes given.

File guidelines for every image

- **Photos:** real photos of the real team, office and events (not stock). JPG or PNG, at least the pixel size shown; landscape unless stated. Keep each file under 3 MB if possible.
- **Name each file** so we know where it goes, e.g. *home-hero.jpg*, *about-ceo.jpg*, *facility-training-room.jpg*.
- **People in photos:** confirm everyone shown has agreed to appear on a public website.
- **Videos:** MP4, under 60 seconds each; or send a YouTube / Vimeo link.
