Cσnductivity Website — §15 Brand Identity, UX and Visual Direction

Checklist · 23 October 2026 · Applies across the whole site (localhost:3000)

Done **Partly** = needs content from the team **Planned** = later, when demand is validated

15.1–15.2 Design philosophy and treatment

Status	Item	Where
DONE	Serious, uncluttered look: white space, clear headings, short text blocks	All pages
DONE	Typography: one modern, readable typeface (Plus Jakarta Sans)	All pages
DONE	Colours: restrained palette from the logo, blue and red on white, with light grey and charcoal	All pages
PARTLY	Imagery: authentic people learning, working, mentoring (with permission). Labelled photo frames are ready; real photos still needed	Home hero, About
DONE	Graphics: simple diagrams for pathways, readiness, employer demand and value (pipeline cycle, hero ecosystem, journey track, two-sides bridge)	Home, Our Model, For Talent
DONE	Iconography: one minimal, consistent icon set (Lucide)	All pages
DONE	Motion: subtle, used to show processes (moving connections, glowing pipeline steps, gentle reveals); switches off for visitors who set "reduce motion"	All pages
DONE	Layout: spacious, clear hierarchy, concise content	All pages

15.3 Website personality

Status	Item	Where
DONE	Plain, professional wording; no exaggerated claims, statistics or logos until verified; "does not guarantee employment" and "future initiative" notes where needed; Pakistani focus with international reach	All pages; team to review the tone

15.4 Experience and accessibility (WCAG 2.2 AA)

Status	Item	Where
DONE	Mobile-first: every section stacks on phones; desktop layouts for corporate buyers	All pages
DONE	Keyboard navigation: menus open on keyboard focus; search opens with "/"; *"Skip to main content" link and visible focus outline added 23 Oct*	All pages (press Tab)
DONE	Sufficient contrast: *brand red adjusted 23 Oct* from #E5322D to #DC2626 so white text on red passes AA (4.83:1); other text checked (4.98–8.44:1)	All buttons and red bands
DONE	Clear labels: every form field has a label; every image has alternative text; page language set to English	All forms
DONE	Useful error handling: required fields marked, clear messages (e.g. "A valid email is required"), "Sending…" state, reference number on success	All forms
DONE	English as the launch language	Whole site
PLANNED	Urdu educational content and localized journeys, once audience need is validated	Later phase

For the team: (1) supply authentic, permission-cleared photos; (2) before launch, run a full accessibility test with a screen reader (e.g. NVDA) and an automated checker (e.g. WAVE or Lighthouse), since these checks cover the main AA points but not every criterion; (3) note the brand red is now very slightly darker (#DC2626) for accessibility.
