Cσnductivity Website — §20 Final Strategic Recommendations

Checklist · 26 October 2026 · Each recommendation, how the website applies it, and where to see it

Done = applied on the website **Partly** = structure in place; needs real evidence, content or team action

Status	Recommendation	How the website applies it · where
DONE	**1. Own a clear market category**	"Conductivity — The Talent Pipeline Company" in every browser tab title, social preview, search-engine details, the Home label, footer and the Our Model manifesto. "A True Talent Company" carries the philosophy on Our Model and, *added 26 Oct*, on About
DONE	**2. Build around two audiences**	Separate journeys: For Employers and For Talent, each with its own questions, services, next steps and form; Home "Two sides" section; header buttons for each
DONE	**3. Keep recruitment inside the larger talent story**	Recruitment is one of six employer solutions and one stage of the five-stage pipeline; "A hire is one event" timeline on Our Model; Home "We Do More Than Fill Vacancies"
DONE	**4. Turn HR and OD expertise into a talent advantage**	HR & OD Advisory and Talent Continuity solutions; Workforce & HR Advisory page; Talent Pipeline Diagnostic examines role clarity and job requirements; "Organizational understanding" in Why Conductivity
DONE	**5. Make talent readiness a defining capability**	Eight connected offerings and the Candidate Engagement Journey on For Talent; "Readiness Makes the Difference" on Home; Readiness, Opportunities, Success on Our Model
DONE	**6. Make the website commercially operational**	Every form routed to an owning team with reference numbers, CRM records and campaign source; CRM Setup Guide with pipelines and KPI reports; Launch Operations Pack (response times); monthly review template. Needs accounts and owner names to go live
DONE	**7. Build credibility before platform complexity**	Launch scope is positioning, content and conversion; dashboards, Passport and AI matching kept as "future"; Trust page states no AI is used to assess people
DONE	**8. Use the website to develop intellectual property**	The Conductivity Talent Pipeline model, Talent Pipeline Diagnostic and Talent Readiness Passport concept are named, explained and visualised (Our Model, Diagnostic, Passport)
PARTLY	**9. Prove the promise with evidence**	Evidence slots on Home ("Impact & Evidence"), For Employers ("Client stories"), About ("Impact and client stories"); no statistics or logos until verified. **Needs real, approved examples**
PARTLY	**10. Create an ecosystem, not just a visitor base**	Separate paths for employers, professionals, students, institutions, mentors and international partners (Partners); segmented newsletter; Career Continuity and alumni stage; preferences page. **Needs the newsletter and CRM running to keep relationships active**

To fully deliver §20: publish genuine, approved examples (client projects, readiness achievements, placements and outcomes) in the evidence slots, and switch on the newsletter and CRM so relationships with all audiences are maintained over time.
