Cσnductivity Website — §21 Proposed Website Manifesto

Checklist · 26 October 2026 · Page: Our Model → Our manifesto

21.1 The manifesto

Status	Item	Where
DONE	Title: "Talent Is More Than a Resource. It Is Human Potential in Motion."	Dark "Our manifesto" section, bottom of Our Model
DONE	All nine paragraphs, word for word as in the blueprint	Same section
DONE	Closing lines: "Conductivity — The Talent Pipeline Company." and "Readiness. Opportunities. Success."	Same section
DONE	Direct link to the manifesto *(added 26 Oct)*	localhost:3000/our-model#manifesto

21.2 Strategic decision for management

Status	Item	Where
DECISION	Choose the primary emphasis: building employer talent pipelines, or developing talent and connecting it to employers	Management, before final design approval
DONE	The site already follows the recommended direction: employer demand has commercial priority (solid red "Build a Talent Pipeline" / "Build Your Talent Pipeline" buttons in the header and Home hero), while the two-sided identity is kept ("Explore Your Career" as the second button, equal Employer and Talent journeys)	Header and Home hero
DONE	The proposition ("we understand demand, develop supply, connect both sides, and sustain the resulting value") is shown through the five-stage pipeline (Understand → Discover → Prepare → Connect → Sustain)	Our Model, Home

> **For management:** confirm the recommended direction (employer demand first, two-sided identity kept). If you choose the talent-first direction instead, the main changes would be swapping which header and hero button is primary and reordering the Home sections; the content itself stays the same.
